

# Top 7 AI Tools of the week :

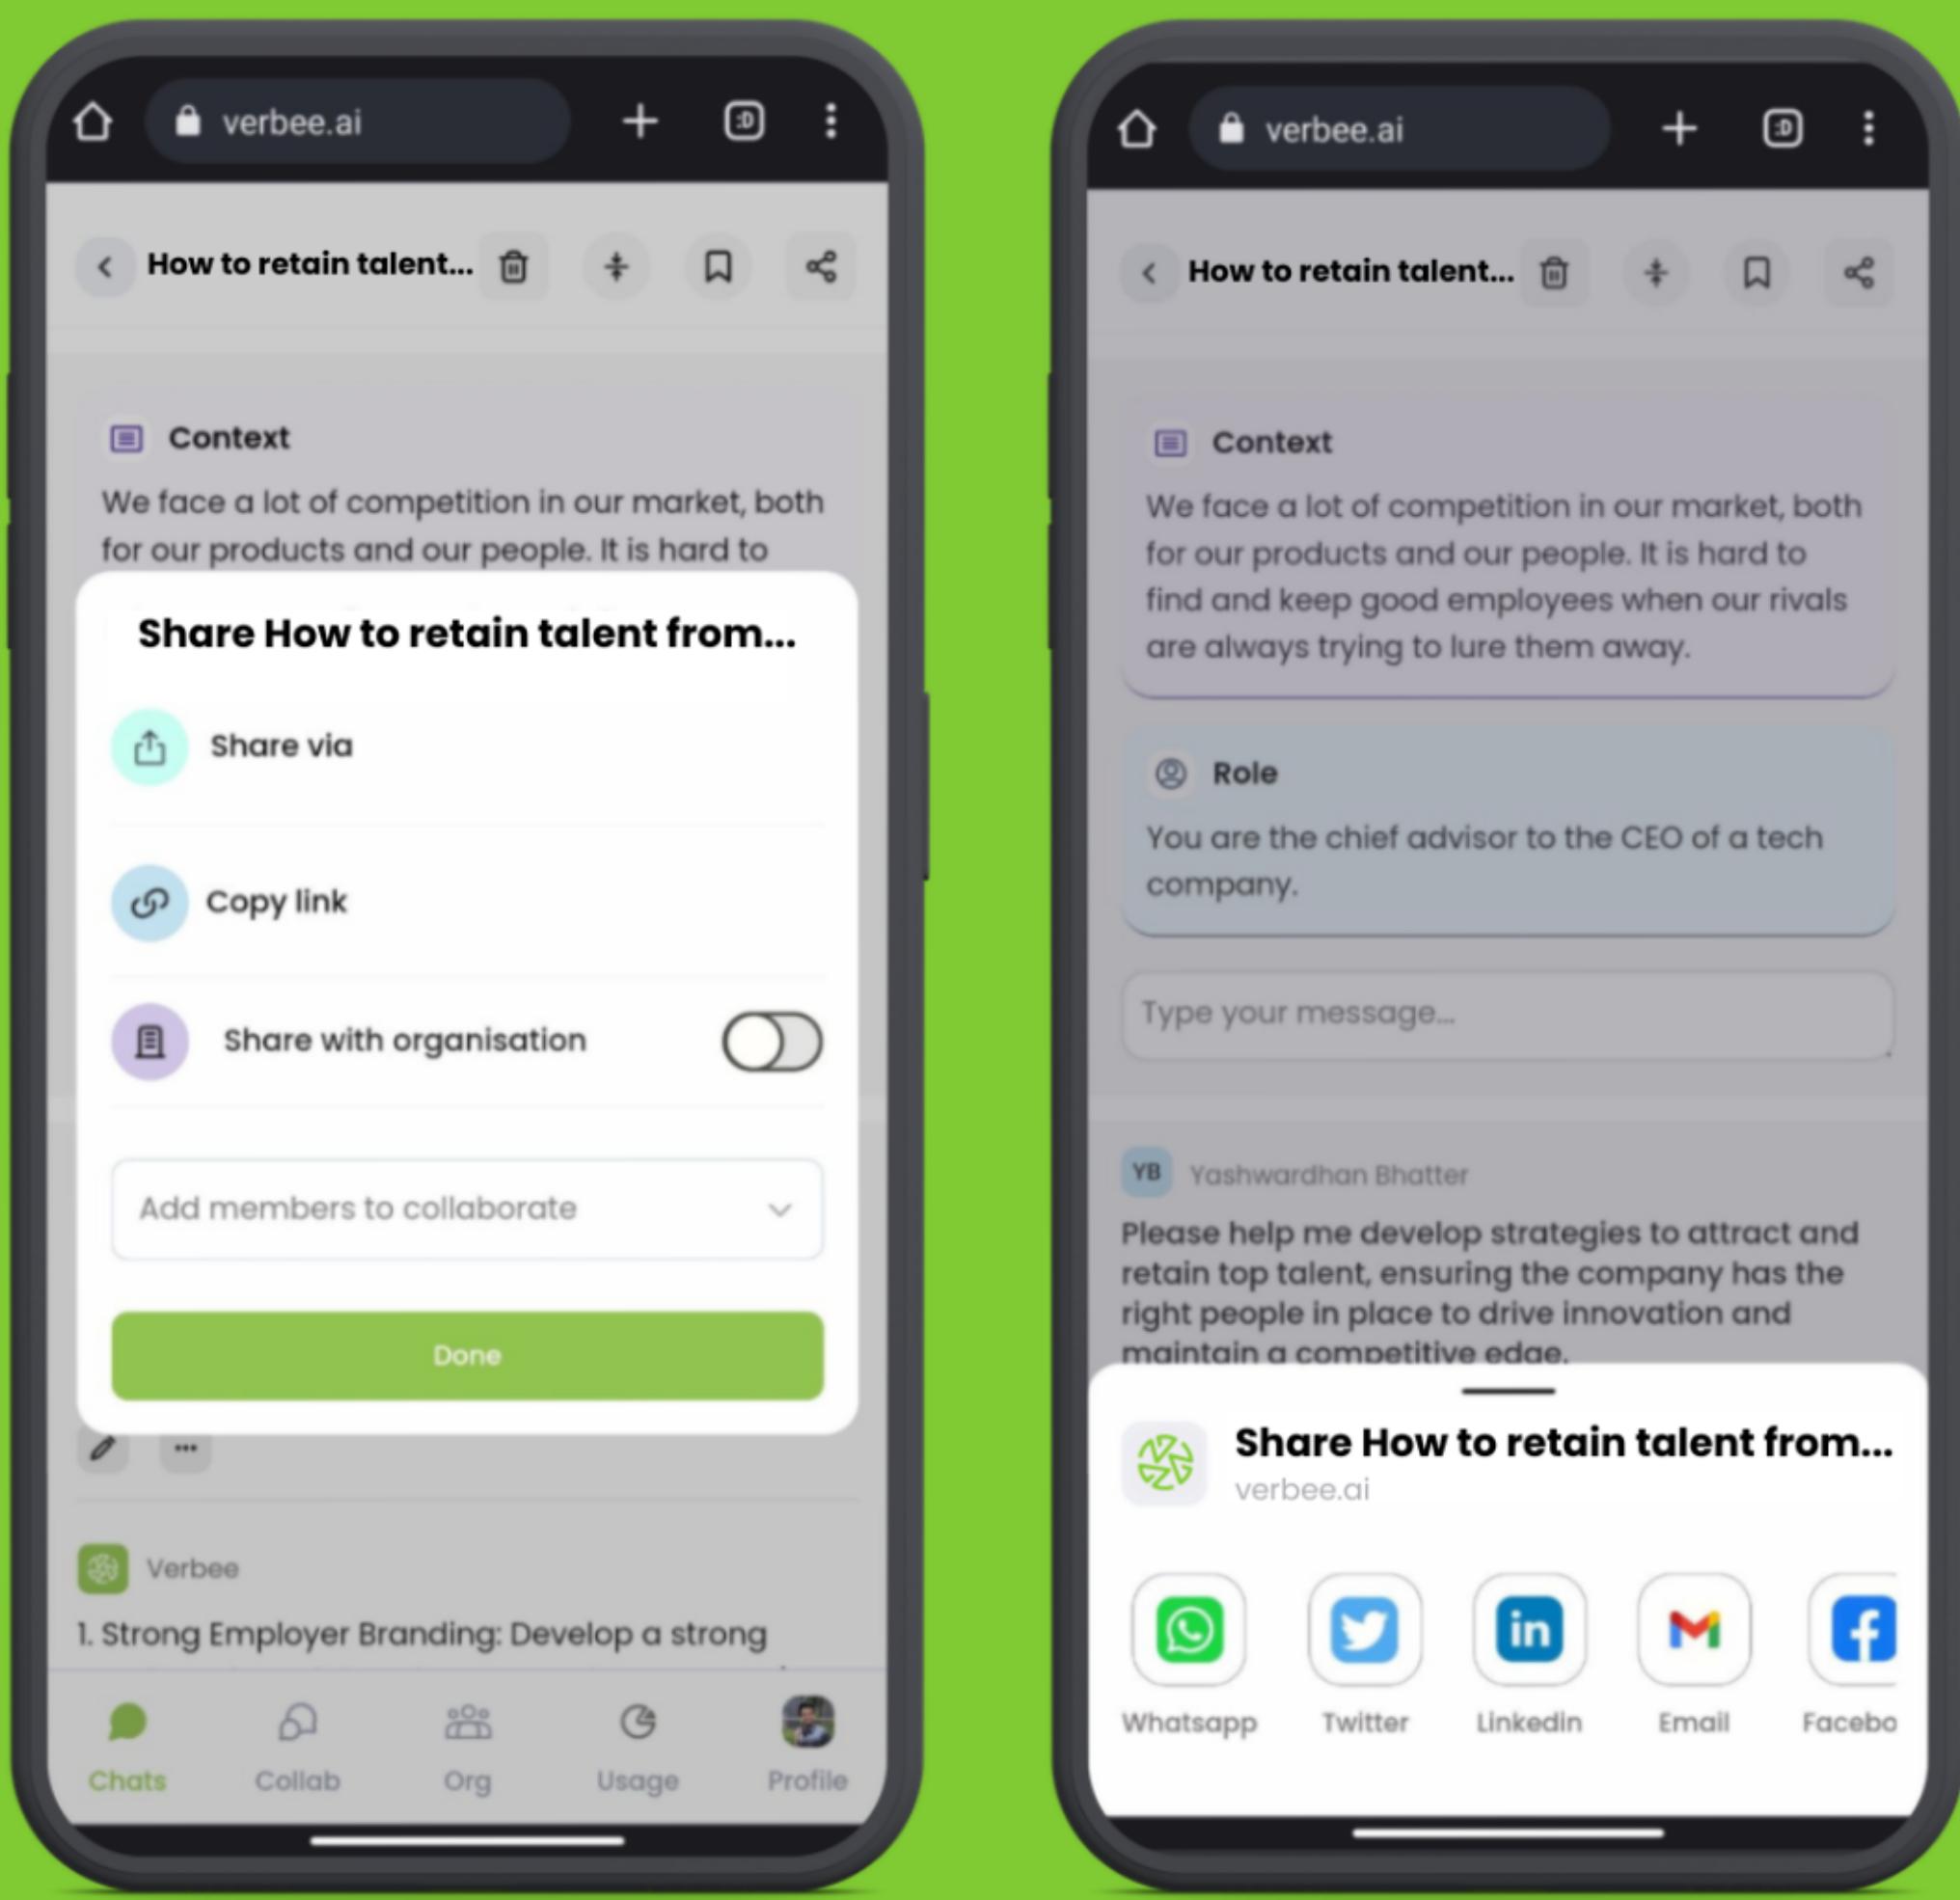

AI will create so many new opportunities in 2023.

These are some new tools that are super helpful.

# Verbee.ai

Now accomplish more with GPT 4

A **ChatGPT interface** designed for organizations to accomplish more from GPT-4. Their **pay-as-you-go pricing model** makes giving access to **GPT-4 to all employees** economical.

It combines the simplicity of Google Docs with GPT-4's power, allowing you to **directly share full GPT-4 chats**, not just screenshots, a **built-in chat sharing feature for pragmatic collaboration**; and more...

## Help me write (Google)

Feature in Gmail can suggest and create full email drafts based on prompts entered by users.

The “Help me write” button is present next to send and formatting options in Gmail and in Google Docs, opening a new page shows a “Help me write” chip and it can also be found on the left edge of the page. It helps users to:

- Formalize: Makes the draft more formal.

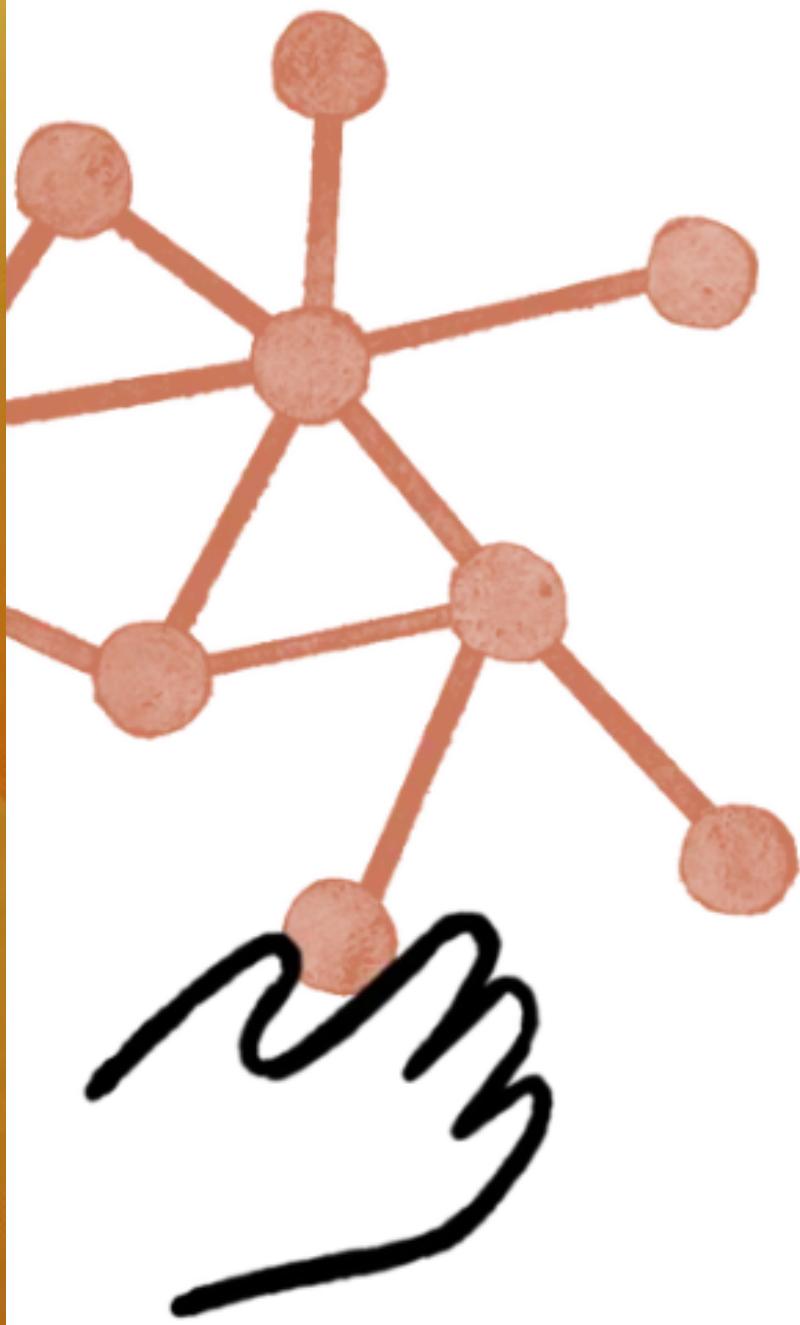

# Slack GPT

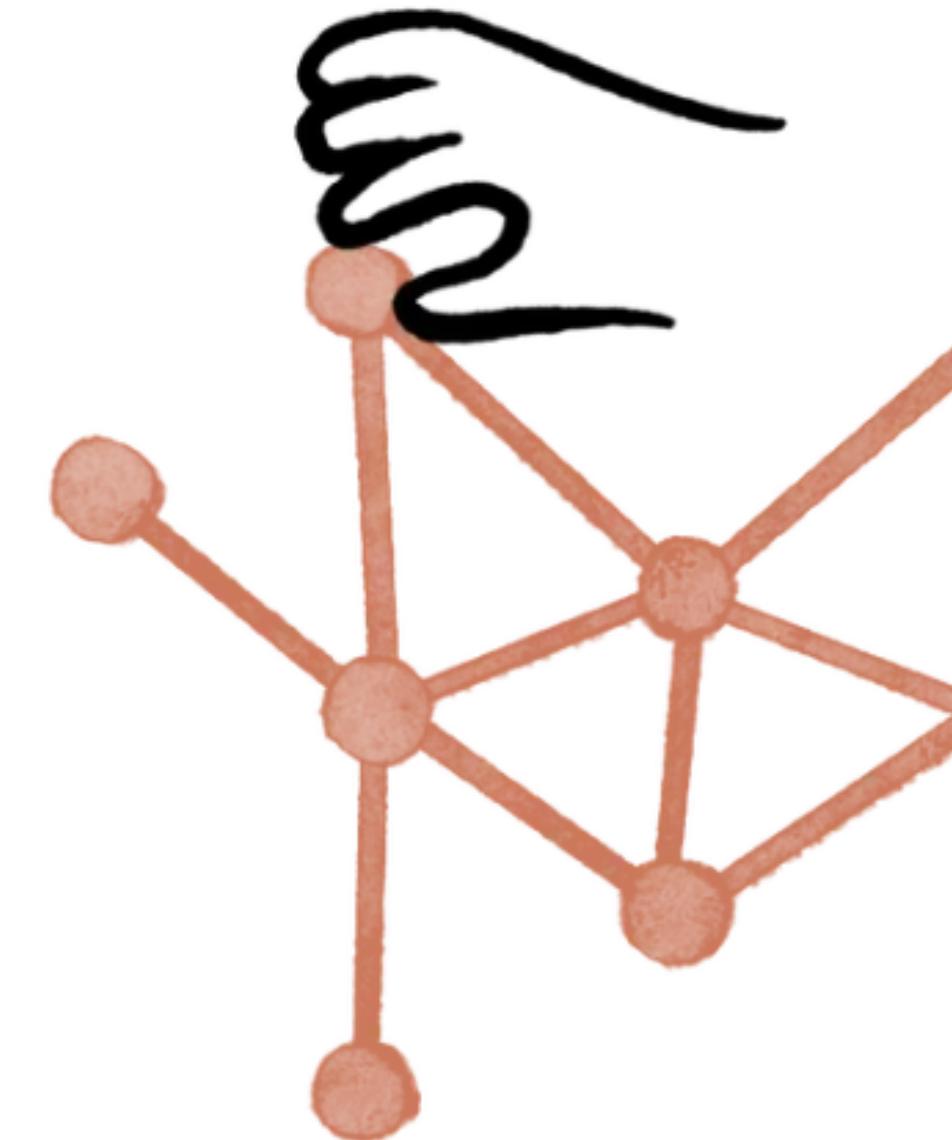

Bringing the power of generative AI in Slack to help you work smarter, learn faster, and communicate better

A set of AI features built directly in Slack, including AI-powered conversation summaries and writing assistance

[www.slack.com](http://www.slack.com)

# Meet Claude

A next-generation AI assistant for  
your tasks, no matter the scale

[Try Claude in Slack](#)

## Claude

Anthropic's chatbot Claude can now analyze an entire book in less than a minute, thanks to its context window expansion to 100,000 tokens or, about 75000 words.

The large context window means chatbots can handle larger works like reading an entire book or engaging in longer interactive conversations.
